

SUPER LOW CONDUCTIVITY FLUID HEAVY DUTY FUEL CELL SYSTEMS

- Electrical conductivity: $< 5 \mu\text{S/cm}$
- Excellent corrosion protection for metal alloys (specifically stainless steel, copper, brass, and aluminum)
- Formulated with non-ionic corrosion inhibitors
- Meets ASTM D8565 specification
- Compatibility: Heavy-duty fuel cell vehicles
- Designed for use with an ion exchange filter
- Diluted with high purity RO / DI water
- Specifically designed to control optimal temperatures in HD PEM fuel cell systems

By choosing **EVX™** products, you are choosing peace of mind. **EVX™** solutions have been developed and tested to ensure compatibility with dedicated indirect electric cooling systems in both battery electric and hybrid vehicles. **EVX™** super low conductivity fluids provide excellent chemical stability, extended corrosion protection and meet specific heavy duty vehicle standard for EG purity.

READY TO USE

ITEM #	PACK	UPC
